

# VACUUM COLLECTION TURNAROUND

## CIP FEATURES & OPTIONS

### **AUTOMATIC CLEANING**

#### **STRESS-FREE & MINIMAL DOWNTIME**

The Chain-Vey vacuum turnaround offers a self-cleaning design during operation, eliminating the need for frequent manual cleanouts, saving you valuable time and money.

Designed for dry cleaning applications, the addition of compressed air nozzles and a dust collection vacuum port offer peace of mind in preventing cross-contamination and eliminating downtime during product changeover.

In addition to all the standard options, such as tool-less entry for easy access, U-track for further reducing product carryover, and pneumatic tenting, the vacuum turnaround can easily be installed, upgrading your current Chain-Vey system.

### **COMPRESSED AIR PORTS**

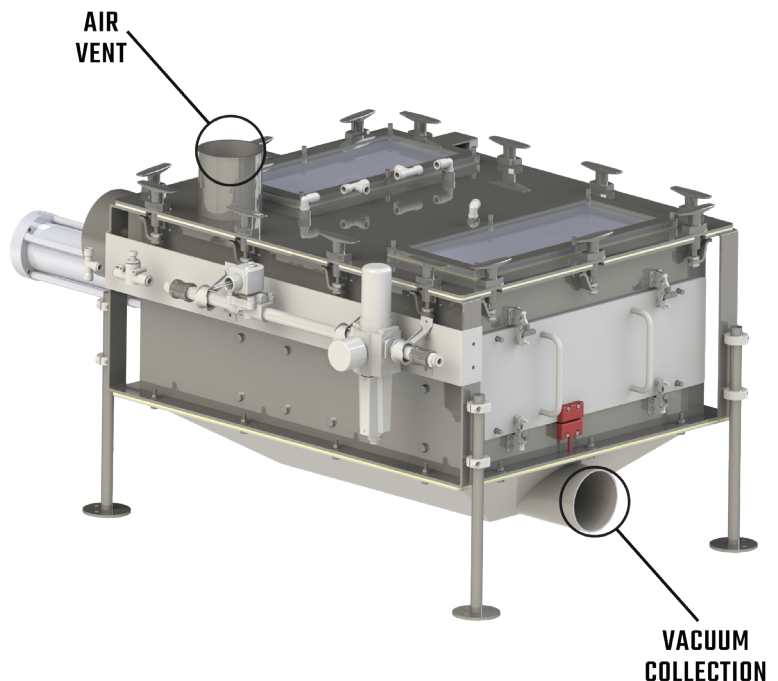

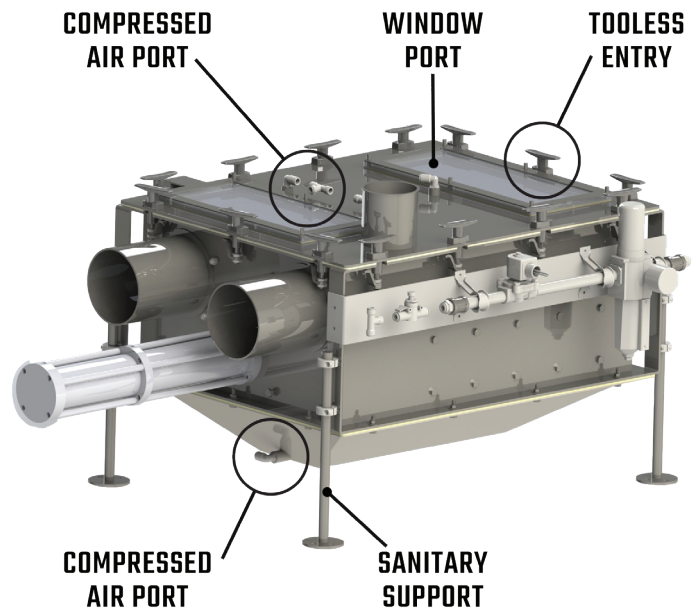

#### **FOR FULL-CONTACT OF CHAIN & DISCS**

Multiple air port nozzles are precisely positioned for a full-coverage spray removing any accumulation of residual material.

### **VACUUM COLLECTION**

#### **ADDED FOR COMPLETE PRODUCT REMOVAL**

Located at the lowest point of the turnaround, the vacuum collection port ensures complete emptying of product from the turnaround.
